PROFESSIONAL SUMMARY

Results-driven Software Engineer II with 4+ years of experience designing and developing scalable, high-performance backend systems. Hands-on expertise in Java, Spring Boot, Kafka, MongoDB, and microservices-based architecture. Led the modernization of legacy systems by migrating codebases from Java 1.7 to Java 17. Engineered and maintained high-availability microservices handling 1M+ daily transactions. Mentored junior developers and contributed to Agile and DevOps adoption. Passionate about building scalable backend systems and mentoring engineering teams.

PROFESSIONAL EXPERIENCE

Entain India | Software Engineer II | Dec 2024 – Present

- Migrated services from Java 1.7 to 17, improving performance and reducing technical debt
- Designed and maintained microservices handling 1M+ daily transactions
- Mentored and upskilled 3+ junior developers in Agile and CI/CD practices
- Led CI/CD pipeline enhancements reducing deployment time by 30%
- Contributed to sprint planning, architecture reviews, and RCA documentation

Entain India | Software Engineer I | Sep 2021 – Nov 2024

- Developed and maintained backend modules supporting high-availability gaming systems
- Implemented RESTful services and real-time features using Kafka and MongoDB
- Enhanced observability using ELK stack for faster RCA and uptime improvements
- Delivered 10+ high-reliability production APIs used by 500K+ users

TECHNICAL SKILLS

- Languages: Java, Python, JavaScript, C, C++, SQL
- Frameworks: Spring Boot, Spring MVC, Hibernate, JSP, Servlets, Angular, JHipster
- Databases: MongoDB, MySQL, Redis
- Messaging & Streaming: Apache Kafka
- DevOps & Cloud: Docker, Kubernetes, AWS, Jenkins
- Monitoring & Logging: ELK Stack (Elasticsearch, Logstash, Kibana), AppDynamics
- ETL & Integration: Apache NiFi
- Tools & Platforms: Maven, Gradle, Git, SVN, Jira, Log4j, JUnit, Mockito, Tomcat
- Concepts: Microservices, Distributed Systems, OOP, Multithreading, DSA, Agile, CI/CD

PROJECTS

DAILY COLLECT – Interactive Reward System

A real-time gamified rewards platform that boosts daily player engagement through interactive, reveal-based rewards. Designed for high concurrency and seamless gameplay.

Role: Technical Mentor & Backend Developer

Tech Stack: Java 17, Spring Boot, Kafka, MongoDB, Microservices, Tomcat 10, Logstash

- Took technical ownership of the Daily Collect project, delivering reveal-based rewards for players
- Designed and developed backend services supporting real-time interactions and seamless gameplay
- Mentored team members and collaborated with the tech lead on implementation strategy
- Built scalable, maintainable services with microservice architecture and centralized logging via Logstash

COIN ECONOMY SYSTEM

A distributed coin management system supporting real-time virtual transactions across multiple gaming zones. Ensures consistency, reliability, and traceability of all currency operations.

Role: Backend Developer

Tech Stack: Java 11, Spring Boot, REST API, MongoDB, Terracotta, Tomcat 9

- Developed core modules for managing virtual currency operations across gaming zones
- Implemented transaction module for coin add, deduct, and history tracking
- Ensured multi-zone consistency with MongoDB transactions and handled time operations using native Java APIs
- Delivered high-performance and reliable modules aligned with NFRs

DIGITAL CUSTOMER RELATIONSHIP MANAGEMENT (DCRM)

An internal CRM platform for real-time, multi-channel customer engagement and campaign orchestration. Enables personalized communication across integrated systems.

Role: Java Developer

Tech Stack: Java 7, Spring 4.x, MongoDB, Kafka, Tomcat 8, IntelliJ

- Developed the DCRM platform to manage multi-channel customer communications and marketing
- Built REST APIs and middleware to integrate CRM with internal and external systems
- Used Kafka for real-time event handling and configured Logstash for centralized logging and observability
- Contributed to architecture decisions and mentored juniors during CRM modernization

EDUCATION

B. Tech – Computer Science and Engineering

MLR Institute of Technology | **CGPA: 8.9** | Hyderabad (2015 – 2019)

KEY ACHIEVEMENTS

- Led Java stack upgrade from version 1.7 to 17 across multiple services
- Maintained 99.99% uptime through proactive monitoring and incident handling
- Recognized for adaptability, fast learning, and strong ownership
